	<u> </u>		
	Page 98		Page 100
1	you mean?	1	referenced in 4.3, what applicable paperwork is
2	A Yeah, it's of that order. As part of the	2	referred to here?
3	procedure for each one, there is a specified time that	3	A It's associated with documents that are a
4	is set for it, but it's of that kind of level of time.	4	part of the process. For example, page 89 of my report
5	Q According to the Rebotix process flow	5	shows some examples of test record associated with
6	estimates of how long various steps take, what's the	6	devices. And you can see there some of the listing of
7	total that Rebotix prescribes as to how long an	7	items and what is done for specific devices.
8	inspection and repair and interceptor process should	8	Q Okay.
9	all take total if the particular instrument is deemed	9	MR. RUBY: It's 5 after 12. There are
10	suitable for repair?	10	still people and we're in various time
11	A There's not a specific time, amount of time	11	frames. I think the witness is entitled to
12	given, as I recall. I mean, it will certainly be very	12	have lunch, and not to mention others. What
13	dependent on steps that are needed. It would typically	13	if we Madam reporter, you need and deserve
14	be, though, on the order of a few hours, but can vary,	14	a break, too. Alan, you deserve a break.
15	certainly, depending on what repair steps and retesting	15	How would anybody feel we took a break, say,
16	might be required.	16	for 40 minutes to 12:45 and then return to
17	Q Do you have any estimate, not a guess, but do	17	our duties? Is anybody offended by that?
18	you have an estimate based on facts as to how long it	18	MR. ERWIG: Sounds fine.
19	customarily or typically takes to sharpen cutting	19	MR. RUBY: Pardon me. If that's okay,
20	features of an EndoWrist instrument when the inspection	20	then we'll be off the record.
21	processes of Rebotix indicate that sharpening is	21	THE VIDEOGRAPHER: The time is now 12:05
22	needed?	22	p m. We're going off the record.
23	A I know it's dependent on what is needed for a	23	(Lunch recess taken.)
24	particular device, but I can't give you a specific time	24	THE VIDEOGRAPHER: The time is now 12:53
25	range there. But other than to say some will need	25	p m. We're back on the record. This is the
	Page 99		Page 101
1	more than others depending on what's required. Some	1	baginning of Madia Unit 4 Planca continua
			beginning of Media Unit 4. Please continue.
2	may need basically nothing additional associated with	2	Q (By Mr. Ruby) All right. Dr. Parnell, when
2 3	sharpening, but many will, and those will depend on the	2 3	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic
3 4	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.	2 3 4	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool
3 4 5	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet	2 3 4 5	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?
3 4 5 6	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look,	2 3 4 5 6	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?
3 4 5 6 7	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says,	2 3 4 5 6 7	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the
3 4 5 6 7 8	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another	2 3 4 5 6 7 8	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to
3 4 5 6 7 8 9	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?	2 3 4 5 6 7 8 9	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?
3 4 5 6 7 8 9 10	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.	2 3 4 5 6 7 8 9 10	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.
3 4 5 6 7 8 9 10 11	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete	2 3 4 5 6 7 8 9 10 11	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional
3 4 5 6 7 8 9 10 11 12	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is	2 3 4 5 6 7 8 9 10 11 12	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her
3 4 5 6 7 8 9 10 11 12 13	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not,	2 3 4 5 6 7 8 9 10 11 12 13	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use?
3 4 5 6 7 8 9 10 11 12 13 14	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings	2 3 4 5 6 7 8 9 10 11 12 13	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use?  A Well, I'm not a medical doctor or surgeon,
3 4 5 6 7 8 9 10 11 12 13 14 15	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings that would need to be done in every case; isn't that	2 3 4 5 6 7 8 9 10 11 12 13 14 15	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use?  A Well, I'm not a medical doctor or surgeon, but generally for things like that, the surgeon will
3 4 5 6 7 8 9 10 11 12 13 14 15 16	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings that would need to be done in every case; isn't that true? There may or may not need to be sharpening after	2 3 4 5 6 7 8 9 10 11 12 13 14 15	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use?  A Well, I'm not a medical doctor or surgeon, but generally for things like that, the surgeon will utilize some form of a of the clamp to close the
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings that would need to be done in every case; isn't that true? There may or may not need to be sharpening after these 4.2 exercises are done, but there are still	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use?  A Well, I'm not a medical doctor or surgeon, but generally for things like that, the surgeon will utilize some form of a of the clamp to close the tissue and it may ultimately be sutured, possibly, but
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings that would need to be done in every case; isn't that true? There may or may not need to be sharpening after these 4.2 exercises are done, but there are still things that need to occur under the process flow; isn't	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use?  A Well, I'm not a medical doctor or surgeon, but generally for things like that, the surgeon will utilize some form of a of the clamp to close the tissue and it may ultimately be sutured, possibly, but there would be pressure applied.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings that would need to be done in every case; isn't that true? There may or may not need to be sharpening after these 4.2 exercises are done, but there are still things that need to occur under the process flow; isn't that true?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding? Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question? A Sure. Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use? A Well, I'm not a medical doctor or surgeon, but generally for things like that, the surgeon will utilize some form of a of the clamp to close the tissue and it may ultimately be sutured, possibly, but there would be pressure applied. Q When a surgeon performing a traditional
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings that would need to be done in every case; isn't that true? There may or may not need to be sharpening after these 4.2 exercises are done, but there are still things that need to occur under the process flow; isn't that true?  A That is true and it's a part of the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use?  A Well, I'm not a medical doctor or surgeon, but generally for things like that, the surgeon will utilize some form of a of the clamp to close the tissue and it may ultimately be sutured, possibly, but there would be pressure applied.  Q When a surgeon performing a traditional endoscopic surgery wants to control bleeding in his
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings that would need to be done in every case; isn't that true? There may or may not need to be sharpening after these 4.2 exercises are done, but there are still things that need to occur under the process flow; isn't that true?  A That is true and it's a part of the inspection documentation here, you know, series of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use?  A Well, I'm not a medical doctor or surgeon, but generally for things like that, the surgeon will utilize some form of a of the clamp to close the tissue and it may ultimately be sutured, possibly, but there would be pressure applied.  Q When a surgeon performing a traditional endoscopic surgery wants to control bleeding in his patient, what instrument would you expect him to use?
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings that would need to be done in every case; isn't that true? There may or may not need to be sharpening after these 4.2 exercises are done, but there are still things that need to occur under the process flow; isn't that true?  A That is true and it's a part of the inspection documentation here, you know, series of tests such as cables, cable adjustment, that sort of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use?  A Well, I'm not a medical doctor or surgeon, but generally for things like that, the surgeon will utilize some form of a of the clamp to close the tissue and it may ultimately be sutured, possibly, but there would be pressure applied.  Q When a surgeon performing a traditional endoscopic surgery wants to control bleeding in his patient, what instrument would you expect him to use?  A Again, with the disclaimer that I'm not a
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings that would need to be done in every case; isn't that true? There may or may not need to be sharpening after these 4.2 exercises are done, but there are still things that need to occur under the process flow; isn't that true?  A That is true and it's a part of the inspection documentation here, you know, series of tests such as cables, cable adjustment, that sort of thing, motion. Yeah, there are a whole series of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding? Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question? A Sure. Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use? A Well, I'm not a medical doctor or surgeon, but generally for things like that, the surgeon will utilize some form of a of the clamp to close the tissue and it may ultimately be sutured, possibly, but there would be pressure applied. Q When a surgeon performing a traditional endoscopic surgery wants to control bleeding in his patient, what instrument would you expect him to use? A Again, with the disclaimer that I'm not a medical doctor, but I would expect similar type of
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	sharpening, but many will, and those will depend on the characteristics of the blade and the testing cuts.  Q Could we go back, please, to that one sheet 3038, PR3038, about sharpening. And if you'd look, please, right at the last line, Dr. Parnell, it says, "complete applicable paperwork and refer to" another part of the process flow. Do you see that?  A Yes.  Q Now, this circumstance here about "complete applicable paperwork," in the process flow, there is still whether the device needs sharpening or not, there still are a number of inspections and cleanings that would need to be done in every case; isn't that true? There may or may not need to be sharpening after these 4.2 exercises are done, but there are still things that need to occur under the process flow; isn't that true?  A That is true and it's a part of the inspection documentation here, you know, series of tests such as cables, cable adjustment, that sort of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q (By Mr. Ruby) All right. Dr. Parnell, when a when a surgeon using traditional laparoscopic tools wants to control bleeding in a patient, what tool does she use?  A Was the question regarding bleeding?  Q Yes. If you didn't pick that up in the question, maybe it was left off, do you want me to repeat the question?  A Sure.  Q When a surgeon performing a traditional laparoscopic surgery wants to control bleeding in her patient, what laparoscopic instrument does she use?  A Well, I'm not a medical doctor or surgeon, but generally for things like that, the surgeon will utilize some form of a of the clamp to close the tissue and it may ultimately be sutured, possibly, but there would be pressure applied.  Q When a surgeon performing a traditional endoscopic surgery wants to control bleeding in his patient, what instrument would you expect him to use?  A Again, with the disclaimer that I'm not a
